SUMMARY

Third-year Computer Science student at the University of Alberta pursuing a Business Minor, with experience in software development, Python-based data analysis, and collaborative team projects. Familiar with developing and debugging applications, working with databases, and using Git to coordinate code changes. Interested in contributing to meaningful software projects while continuing to grow as a developer.

SKILLS

- Programming: Python, Java, C, SQL
- Web Development: React, TypeScript, HTML/CSS
- Databases: SQLite, MongoDB, Firebase/Firestore
- Development Tools: Git, GitHub, Android Studio, VS Code
- Development Practices: Agile Development, Debugging, Testing, Requirements Gathering, Code Collaboration
- Design: Figma, UI/UX Design
- AI & Automation: Large Language Models (LLMs), Generative AI Tools

EXPERIENCE

Web Developer | ARVP **Sep 2026 - Present**

- Maintain and improve an existing website by identifying UI/UX issues, inconsistent layouts, broken functionality, and opportunities to improve usability.
- Implement frontend updates and feature improvements within an existing codebase while maintaining consistency across website components.
- Troubleshoot website issues through testing and iterative debugging to identify problems and validate fixes.
- Collaborate with team members to gather requirements, clarify website needs, prioritize improvements, and communicate development progress.

Junior Research Assistant | University of Alberta **Sep 2026 - Present**

- Support PhD and Master's researchers under Professor Alona Fyshe in research exploring applications of Large Language Models (LLMs) in neuroscience.
- Process and analyze text datasets using Python to investigate machine learning model behavior and identify performance patterns.
- Develop reproducible data-processing workflows for dataset preparation, analysis, and experimental evaluation.
- Collaborate with graduate researchers to investigate results, identify patterns, and communicate findings throughout the research process.

TECHNICAL PROJECTS

Event Flow 2026– Mobile App Developer

Java | Android Studio | Firebase | Firestore | Git

- Collaborated in a five-person Agile team to develop an event-management application supporting event creation, lotteries, waitlists, notifications, and multiple user roles.
- Led UI/UX design, translating project requirements into user workflows and application interfaces.
- Developed, tested, and debugged features involving databases, authentication, image uploads, notifications, and waitlist constraints.
- Used Git feature branches and iterative testing to coordinate development and integrate functionality across a shared codebase.

Sakura Sonata – Developer |HackeD Hackathon 2026

Python | MIDI | AI/ML

- Co-developed an AI-assisted piano learning prototype in a 4-person team, converting musical input into structured MIDI data and interactive visualizations.
- Led UI/UX design, creating an intuitive interface and user workflow while contributing to AI-focused learning features.
- Rapidly prototyped, tested, and troubleshot the application during a 3-day hackathon to deliver a working prototype under time constraints.

Database Applications & Data Management — Developer 2026

University of Alberta | CMPUT 291

- Built Python-based database applications using SQLite and MongoDB to manage, query, and organize structured datasets.
- Designed and tested data operations, including data loading, authentication, querying, and record management.
- Applied SQL and Python to develop and validate database functionality.

Client Portfolio & Multimedia Showcase Web Platform - November 2026

HTML5, CSS3, JavaScript (ES6+), Git, GitHub Pages

- Built and deployed a custom portfolio website for a digital journalism client using HTML, CSS, JavaScript, and GitHub Pages.
- Designed dynamic UI components, including viewfinder video cards with persistent audio settings and full-scale editorial document viewers.
- Managed end-to-end Git production workflows, modular data structuring, and cross-device visual optimization.

EDUCATION

Bachelor of Science, Computer Science, Business Minor | University of Alberta | Sep 2024 – Present
